TWENTY LIVELY ROUNDS FOUGHT

Smith Did Most of the beading and ls Now in the Champion

Class.

SAN FRANCISCO, October 4.—Solly Smith of Los Angeles was given the decision over George Dixon of Boston in a twenty-round light tonight. The match was virtually for the champion-

mater was virtually of the common ality of the featherweight class, and Smith is now at the top.

The fight was not a remarkably fast one, the men taking no chances except in two or three rounds, when Dixon establishment. aved to force matters. Smith, however, who has greatly improved since he last met Dixon, had all the better of the infighting, using his right with effect both on the body and head.

noth on the body and head.

Smith was cool throughout the fight and same out without a mark of any tind. His blocking and ducking of Jixon's leads were the features of the light and kept him out of harm's way. George Dixon slepped into the ring at 19:10. His seconds are Tom Piconske and Young Mitchell. Joe Yalcott is bottle-holder.

Solly Smith coters ring at 19:13, acompanied by Tim McGrath, Tim Laulag and Spider Kully.

George Green has been selected to act

Time was called at 9:21. The man are allowed to hit in the clinches with one arm free.

Bound 1. Both are sparring for an opening. Smith lands a loft saving on Dixon's lace, Again Solly sends in the loft swing on Dixon's lace, Again Solly sends in the loft swing on Dixon's head without a return. Smith again tree with his left rand is rountered with a loft hook on the face. Bixon in forcing now, but his lacks are hinked. Solly sends in the loft swing good and hard on meck as the loft swing good and hard on meck as the Round 2—Smith opened the second round with a rush nonlanded loft lightly on the face. George put a hard left on Solly's nack. The man mixed it, both trying with right in the climb, but wore too close together to de much damage. Round 3—George did most of the leading, but Solly stalled off the black lad and countered twice with his right on George's head. George landed loft lightly on the head.

Round 4—Dixon opened with a rush, but Solly got under it and came back a moment later with a left swing in George suck, Smith tried hard with his right for the law, but George came in behind it. Solly put a terrific latewing on Dixou's stomach. Solly rushed George with a loft on the neck. Smith sounds—Solly rushed George with a loft on the neck. Smith's claverness in ducking Dixon's leads and his coolness wore the leatures of this round.

Bound 5—Solly ducked into a loft up-

Round 8—Dixon was careful and kept mith at arm's length. Soily put in nother right over the kidneys, and sorge's ribs looked raw. In a clinch corge put a good right on Soily's ear. Round 9—Dixon forced the pace and ally met him with a left and right on each case. Soily put a right overland wing on Guorge's back and followed a moment later with a loft swing on the ock. George reshed and Soily ducked jear from Dixon's left. Round 10—Soily rushed, our Dixon deper from Euxon's left.

Round 10—Soily rushed, our Dixon copped him with a hard left ou the core. Soily put a clean straight right ver Goorge's heart. George led with the tame back with a hard right on lixed and Soily ducked left and Smith they back to avoid it, and the same back with a hard right on lixed and son'th line was a corker. Both

Ontendo, October 24.—The opening in wheat was quiet enough and some strength was shown. December, which closed Saturday at 90% to 90%, started today at 80% to 80%. But ton minutes after the opening the market was treated to a break which for a few moments put traders on the verge of a panic. The

price shunped nearly 2 cents in about as many minutes. It came so suddonly that the trade was convinced that Saturday's curity for the stories of 'put' purchases of 3,000,000 busines had some foundation in fact and that the leading bull interest was gailing ready to liquidate, These rumore had the effect of precipitating general selling.

While the opening hiverpool cables noted a decline of 3/d from Saturday's closing, there had been a sharp rolly there later. The weather man showed also that the drought was partially broken in the methwest by showers which covered the three big spring sintes.

A waxe reader was "jugged" at Hauford the other day for vagrancy. His services at the time might have been of real value to the raisin bears. He could have read the minds of the growers and given the bears the important information that they were wasting their time trying to get raisins for less than 3% cents in the swestbox.

No Republican administration in Presno has ever denied to the volunteer framen the right to select from their own ranks the men for the paid places. To the contrary, it has always upheld the department in that right, and the most satisfactory results have followed The department has no superior in the state as a fire-fighting organization.

It might be well to remind the politicians who are reckoning on the "combined forces" that there is a people's earty in this state—a party of principle, even though the place-seeker seek and find not. This party will decline to adorn as tall feathers the Democratic bird.—Thiere County Ners.

The right of the Bremen to select mon from their own ranks for the paid places has long been conceded by the trustees.

That it is a concession is granted, but that it is a just and wise concession experience has proven. Under that rule harmony has prevailed and the department has grown in efficiency. Every cities.

Anderson Akers va. Southern Pacific Company: demarker to membed complaint appeals and form the department the right they have enjoyed. They propose to improve the volunteer firemen and arbitrarily exercise the power to put outsiders over them. Regarding this proposition the Expositor says:

The References says in substance that the fire department which was turned out by the Republican board in 1898 was "nomposed of rowdies and loads and loads and loads and loads and loads and the statement of the same that the fire department which was turned out by the Republican board in 1898 was "nomposed of rowdies and loads and load and loads and l

unacq out by the Republican board in 1893 was "composed of rowdies and loughs," and for that reason they acknowledged the authority of the board (whether Democratic or Republican), but that the present "relif-respecting" members of the department will not submit to it.

Nor will they. And this statement has no reference whatever to party sililistion. Democrats do not differ with Rapublicans in the matter of demanding just and fair treatment. Self-respecting volunteer firemen, whether Democrate or Republicane, will not submit to the contemptuous disregard of their services and their reasonable wishes. They know that it is unjust to sek them to do it, and good citizens, with good red American blood in their veins. do not tamely submit to injustice, no matter what their political views may be. Let this combination proceed with its achema to disrupt the existing department and it will soon make the discovery that the better class of citizens Democrate and Republicans alike, will not serve as volunteers under their arbitrary role. Under the present regime in the board, Jos Spinney holds the while hand. No changes can be made without his approval. Does the Experitor believe that self-respecting Democratic colunteer firemen would quietly submit to having outsiders put over them at the dictation of the Fifth ward.

The regular meeting of the Board Oity Trustees last night was attended by very member of the board. The audicariom was packed with citizens and volunteer fremen, and although he knew that all eyes were centered on him Spinney was apparently as gay and happy as ever. The action passed off prietly. No headsman's work was done, and the employes marked out for the Democratic ax were allowed to serve the city and draw their salaries for two weeks longer, unices a special session should be called in the meanling.

should be called in the meanthine.

Spinney, Chittenden and McVey, constituting the Decocratic majority, maintained their defaut attitude toward the fire department. They laid on the table the recommendation of the freemen that Lad F. Winchell be appointed driver of the chemical suginer in place of Edward A. Stam, whom the board employed at its special moeting hat week. Yestorday Mr. Stam handed his regionation to Clork Shanklin, but last evening before the council convened he with-

kappar presented at the last meeting for remarks of liquor licousas were granted. Mayor Oraycrott stated that he had made investigations and was the opinion that the remarks about the apinion that the remarks about the allowed. Positions for further remarks were received from the following:

Mary Allison positioned to have a lateral asserce constructed through block 28 west of the railroad. The request was granted, and the board passed a resolution to have the work done.

Alva E. Snow aghed to have a lateral ewor laid through block 293. The petition was granted.

A petition from a number of property-owners and business men was received, asking that Mariposa stress be opened across the Southern Pacific railroad. On motion of Trustee Spinney the potition was referred to the board as a committee of the whole and to the city attorney. Mayor Orayeroit was to have before the connect adjourned, but it shiped his mind.

warrants will be issued tomorrow morning by the clerk as far as the funds will reach.

A bill of \$27.50 from W. S. McSwain, for his corvice as a special policonan dring the suspension of Anderson and Barrett before thair discharge from the force, was referred to the city attorney. Mr. Sinth stated bint he did not wish to pass an opinion on the claim until he had looked up the law. The question rised was whether or not McSwain was outtiled to the money because he did not hold the position legally, not having been a resident of the city for a year prior to his omployment, as is required by law. It was because of his includibity on this ground that the special was discharged by the board.

Tractus Spinney was auxious to have the attorney deside the inatter, as the board which to transcat some further business in which this question would be involved. But Mr. Smith said he did not feet justified in passing an off-hand opinion.

Spinney then moved to adjourn and the motion carried.

It was understood that the "further business" Spinney desired to transactions for engine driver of Led Winchell, who of late has not been residing in the city.

In the Chronicle of yesterday Boynton excess his side of the story. He asserts with emphasis that he hes been guilty of not i conoral act, but rather the victim of suitable manning an inharmenious marriage, the yele which had become insupportable. He pleads guilty also to the habit of extreme temperance, which, he says, some propised Lee Banes, with its thirteen saloons, regarded as an inexcusable occentricity. Professional and business rivalry, he declares, played no small part in his unpleasant predictions, and when the alleged "white cape" under took to regulate his affairs by the tar and feather code, followed by a notice of a stay of proceedings for forty-eight hours to enable him to leave town, he accepted their declates, he declares, e.e. e.e. e.e.fl. executing decision, and came to San Francisco to make his appeal.

Boynton says he was not personally ofraid of another visitation from the regulators, but that he feared that they would break into his house and apply the feathered asphaltum to Mrs. L. C. games in swimming which will help to make the sport more fascinating than

it is.

Fow people realize how very nearly the human body comes to fleating. Drop your arm leosely in the water and it will rest near the surface, buoyed in its place by the pressure of the water. If it were not for the weight of the head in proportion to the weight of the lead in proportion to the weight of the budy, a man would swim as easily and naturally as a horse or a dog. With these facts in mind the good swimmer or fleater keeps as much of his budy ander the surface of the water as he can. On tioater keers as much of his body ancer the surface of the water as he can. On the same principle aswimmer may keep himself altend by bolding a very small piece of wood in each hand, provided he allows himself to sink deep into the water in the position shown in the picture. Any boy or girl may readily test this plan. It merely requires a little confidence in letting the body so deep into the water.

communice in maning the body so deep into the water.

A hig Swede named Stromberg, who made himself famous several years ago as a swimmer, well knew this plan. Sometimes in making long practice swims he took with him a connect niger of each four or the inches agent.

it becomes well souled.

One of the greatest sports "in swlmming": may be had with a small rubber tube 10 or 13 feet long. Two large empty spools should be fastened to the emis of the tube by crowding the ruber into the hole in the middle of each, which has first been onlarged with a

jackknife. The swimmer allows one of the spools to float on the surface of the water or fastens it near a stone or leg on shore or next to a stake driven into the water. Then he places the other spool in his month and sinks out of sight under the water. Of course he can breathe through the tube and he can remain a considerable length of time without rising to the surface. Any hoy will readily imagine the various pracks that may be played with such an invention. It will also be found useful in diving for lost objects.—Chicago Record.

Out at the end of the Molliur place electric line is a vineyand so large that if one stand in the middle of it, unless, indeed, he choose a knoll, be can see ucthing but grapevines in every direction. It is the property of Peter Muchlebath, who, over 40 yours ago, broke the wild ground und planted the young vines. The Kaness and Missouri state line bisects the domain, and it is said that the vintage of the prohibition commonwealth possesses a flavor at once pignant, delicate and suspiciously like that of Amonthilade stolon from the cellars of the rich.

The story is told of a Kansas City physician who called upon the vintner with a view to engaging summer heard for a patient in poer health, who, it was thought, would be benefited by the country are and pure native wines. The shoctor was very fastidious in his demands in behalf of his patient. He must have only the purest wines. They must be wines of the highest grade.

Then with the air of a connoissent he desired to know of what varieties of grapes the old Germant's wines were made and in what manner they were mixed. This was too much for the patience of the vintner, whose pride in the quantity of his product is such that to question its excellence is almost to insult him. Taking the dector by the arm he guided him to the middle of the road, pointed to the west and said:

"Yes," replied the dector.

The Pracock at Home.

The real home of the peacock or peafowl is in India. There they were and are hunded, and their fieth is used for food. As these birds live in the same region as the tiger, peaceds tunting is a very dangerous sport. The long train of the peacock is not list tall, as range suppress, but is composed of feathers which grow out just above the tail and are called the tail coverts. Peacocks have been known for many hundred years. They are mentioned in the Bible. Job mentions them, and they are montioned, too, in I Kings z. Hundreds of years ago in Rome many thousand puacocks were killed for the great feaths which the empetur made. The hurains of the peacock were considered a great treat, and many had to be killed for a single feast.

A German paper is responsible for the amounteement that Banny Barnato, still more than the Legendary king of Peru, who was wont to have his body gibled affects even menting, deserved the title of El Borado—the "Man of Gold"—note because of his would be of his connection with gold mines, but because his system actually secreted gold. He was, says this credible nutlibrity, the victim of a discusse called metalities, his blood being permented with a powdery gold, as were his eyes, nose, ears and all of his mucous membrane. The pain caused by this condition was so intolerable that if is believed to have been the cause of his switch.

A Valuable Dickage.

The great lens for the telescope of the Verkes observatory, which has been in process of inishing in Combridge, nort, Mass., for the just five years, was recently taken to Chicago in a parlor car, the whole car being devoted to this one package of freight. The lens, weighing with its frame about 1,000 pounds, was packed in double boxes, with springs believen the walls of the inner and outer easing, and it was leaded in the center of the car in order to place First Reformer—I'm trying to write an essay on the emanetpatien of my sex, and I find it very hard to begin. The question is often usked, What is the probable increase in speed to be in the future and in what direction are see to look for improvements with a view to clutain it? One ovidest mode of increasing speed is by augmenting the size of the vessel and its mechinery, as, if the proportion of weight allotted to the machinery is the same a greater speed will be obtained. To secure speed by this means, however, does not involve any special skill or anything in the unitary of improvement. All that is necessary is simply to reproduce the same description of hull and oughtes,

How They Would no Treated.

Professor Horkomer, in a recent lecture, indulged in soma amusing speculations as to how the old masters would be treated in England today. Michael Angelo would be regarded as morose and peculiar. He would not get elected to the academy as a young man and would decline the honor in his old age. Leonarde da Vinci would be the inventor of the electric light and would write to The Times about himself and his crities. Enhens would be un M. A few handred feet in the air, just above what is known as the magnetic disturbance of the earth's surface, the electric waves run in long, straight lines. They are called the Hertzian waves, refer young Heat, their discovery. The waves are, in fact, found everywhere in the air, but up them they can be need without the danger of local disturbance, and Mr. Testa lans, by a long series of experiments, learned to take hold of them and flash a light precisely as a sunteam is insheld from a mirrer. He has learned to threw the electric energy of those waves into a lattery and turn a distant machine connected with this battery by wire. Mr. Testa has a machine in his laboratory, that he calls an escillator, that generates these waves and projects them into the atmesphere just as mature does. With this oscillator he has successful making certy calculation necessary to flash a message without a wire to any part of the carth, or to take the electric waves generated by the great power of Ningara and grind when it Argentine, or run the trafley cars in Sydney. This is no longer speculation, but science, and with time and capital such a gigantic seale will be realized.—Karional llevelor. Recorder. By breaking open rotten legs one can find in midwhiter the grabs or harve of many of the wood boring beetles, and teneath legs and stones near the margins of pounds and brooks hordes of the magnets or larvae of coutain kinds of dits may often be found huddled tegether in great masses. The larvae of a few batterflies also live over winter beneath chips or bunches of loaves near the reads of their food plant, or in wabs of their over construction, which are weven on the stems close to the buds, whose expanding leaves will furnish them their first meal in spring.—Now York Commercial. Matograph Flends.

The author of "Chuts With Culebrities," Mr. Guild, says of the domaind upon Longfellow for his nutograph:
I remember one very pleasant party at the poet's dinner table, at which Mr. Monti, Professor E. M. Horsford and myself were present, when Mr. Longfellow related a number of amusing anecdotes respecting applications that were made to him for autographs. He was very kind to autographs flews very kind to autographs flews very kind to autographs. He was very kind to autograph scheers and used to keep in a little lox upon his writing table a annaher of slips upon with were written, "Years very truly, Henry W. Longfellow." One of these would be sent to the applicant by a would be sent to the applicant by a member of his family to whom he passed member of his family to whom he passed over their requests.

But the autograph sockers were not always satisfied with a mero signature, and he often sout a verse from one of his poems signed with his name. The most remarkable request, however, earns from a lady in Boston, who, the poet said, sont him by express a meckage of 100 blank visiting curds, with a latter requesting that he would insertine his name on each of them his next day, as she was to have a grand reception at which a number of literary people would be present, and she wished to present each one of her grusts with the poet's autograph.

Chaldean Weapons.

The analysis of Berthelot not only shows that the Chaldean weapons, ornaments and tools of 5,000 or 6,000 years ago were of jure copper, but that iron, eliver and gold were known. The copper age purceded that of bronze, which appeared later in both Egypt and Chaiden. It is further noted, morrower, that the form of intchets with bandles, the process of manufacture and even the pure copper lateblets of Chaldea and the prehistoric bathelets of Europe.

It is said that an American went into a London bookseller's and asked for Hare's "Walks in London." In the United States it is printed in one volume, in England in two.

"Oh," said the Vankeo as he looked at them, "you part your Hare in the middle, do you?"

"I, sit?" said the oterk, with a bewildered look. "Oh, no, sir!"
"I saw he didn't see the joke," said the Vankee, "so I didn't explain, but bought the books and went away. A week later I entered the same shop. As soon as the clerk saw me he approached me, exclaiming: "Good, capital! Fart your hair in the middle? That's capital, is—capital!"—Ancedetes.
